593 Eddy Street
Providence, RI 02903
Dr. Danforth organized the fracture service at Rhode Island Hospital in 1931—one of four oldest and continuously functioning approved fracture residences in the country. A graduate of Bowdoin College and John Hopkins University, Dr. Danforth was respected here and abroad as a leader in orthopaedic surgery. His meticulous concern for quality patient care, education and research served as an inspiration for all those who had the memorable experience of working with him.

In 1957, Mrs. Danforth established the Murray S. Danforth Orthopaedic Fund for resident training and research as a living memorial to her husband. This has provided many teaching benefits for the orthopaedic resident staff and is highlighted by the annual Danforth Oration presented each year by a distinguished orthopaedic surgeon.

**Target audience**: This program is designed for orthopaedic surgeons, primary care physicians, researchers and others interested in orthopaedic medicine.

**Objectives**: At the conclusion of this session participants should be able to:

- Recognize the current management of femoral neck fractures in the U.S.
- Describe the rationale for open reduction
- Discuss the technique for open reduction
- Identify the opportunities for participating in ongoing clinical trials
- Discuss the professional tradeoffs in participating in clinical research
- Discuss the list of opportunities for involvement in clinical research & professional activities
- Recognize the variety of Orthopaedic research being conducted at Rhode Island Hospital

**Rhode Island Hospital**

**Gerry House Lounge**

**7:00 am** Breakfast

**7:15 am** Welcome Address

  Michael G. Ehrlich, M.D.

  Vincent Zechino Professor & Chairman

**7:30 am** The Danforth Oration

  Marc F. Swiontkowski, M.D.

  "Fixation of the Femoral Neck Fractures: Timing & Technique"

**8:30 am** Break

**8:45 am** Trauma Fellows Presentations

**Steve Behrens, M.D.**

  "Biomechanical and radiographic evaluation of lateral ankle instability"

  UPMC Center for Sports Medicine
  Sports Medicine Fellowship
  Pittsburgh, Pennsylvania

**Benjamin Bruce, M.D.**

  "Effect of calcaneal osteotomy on tarsal tunnel volume"

  Rush University Medical Center
