Program Overview

Target Audience: Orthopaedic Surgeons and healthcare professionals interested in obtaining knowledge of the certification of orthopaedic surgeons.

Objectives: Following this lecture, participants should be able to:

- Explain the role of surgeons/orthopaedic surgeons in disaster response
- Identify disaster training opportunities for orthopaedic surgeons
- Relate the history of the AAOS, ACS, and OTA in disaster response

Caroll M. Silver, M.D.

From 1946 to 1969, Caroll M. Silver was Chief of Orthopaedics at The Miriam Hospital. In that role, not only did he build one of the dominant orthopaedic forces in Rhode Island, but he gained national recognition for his innovative surgical procedures on temporomandibular joint arthritis, and his highly successful treatments of pediatric orthopaedic problems. He graduated from Columbia with a Bachelor of Science in 1932 and from Rush Medical School at the University of Chicago in 1936. He trained for orthopaedics at the Hospital for Joint Diseases. One of the most distinctive features of his life was his humanitarian efforts on behalf of the third world, teaching and operating in over 20 countries throughout the world.

Dr. Caroll M. Silver
